Art Unit: 3722

1. A substitute specification including the claims is required pursuant to 37 CFR 1.125(a) because the specification as originally filed has numerous lines which have been compressed during photocopying, such that they are difficult to read.

A substitute specification filed under 37 CFR 1.125(a) must only contain subject matter from the original specification and any previously entered amendment under 37 CFR 1.121. If the substitute specification contains additional subject matter not of record, the substitute specification must be filed under 37 CFR 1.125(b) and (c)

2. Claims 1, 2, and 4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 begins, "Method to make holes...." but the claim never does actually set forth the step of actually drilling a hole. Claim 1 should be amended to include the step of drilling the hole. On line 4 of claim 4, the phrase "it will be holed" reads awkwardly. "Holed" should probably be replaced by "drilled." A similar situation exists on line 4 of claim 6.

3. Claim 3 is allowed.

4. Claims 1, 2, and 4-6 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action. It is noted that the examiner has worked with the assumption that claim 1 was intended to set forth the drilling step. If the claim is amended such that it does not include the drilling step, then the examiner may revisit this claim for determination of patentability.
